PROFESSIONAL SUMMARY

Full-stack .NET developer with 3+ years of experience delivering production web applications with ASP.NET Core, Angular, and SQL Server. Strong in RESTful API design, Clean Architecture, CQRS, and SQL performance tuning, with hands-on experience in containerized microservices (Docker, Redis, RabbitMQ, Kubernetes). Comfortable owning features end to end, from requirements and database design to deployment. Seeking a mid-level full-stack role building scalable, well-architected systems.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL

Backend: ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, LINQ, SignalR, Hangfire, FluentValidation, AutoMapper, JWT

Frontend: Angular, HTML5, CSS3, Bootstrap

Database: SQL Server (stored procedures, indexing, query optimization), Redis

Architecture: Clean Architecture, CQRS, SOLID, OOP, REST APIs, Microservices, Message-driven design

DevOps & Tools: Docker, Docker Compose, Kubernetes, Minikube, RabbitMQ, Git/GitHub, Firebase

PROFESSIONAL EXPERIENCE

Full-Stack .NET Developer Jan 2025 – Present

Health Insights Group | Cairo, Egypt

- Build, test, and maintain full-stack web applications across API and UI layers using C#, ASP.NET Core, Angular, and SQL Server.
- Design and deliver RESTful APIs and integrate them with Angular front ends to power core product features.
- Apply SOLID principles, Clean Architecture, and CQRS to keep the codebase modular, testable, and easy to extend.
- Improve database performance and reliability through stored procedures, indexing, and query optimization in SQL Server.
- Implement validation, object mapping, and background processing with FluentValidation, AutoMapper, and Hangfire.

.NET Developer Nov 2023 – Dec 2024

VetICare | Remote

- Developed and maintained .NET Core web applications supporting day-to-day veterinary clinic operations.
- Built and optimized data access layers with Entity Framework and SQL Server.
- Contributed to software design and system architecture decisions in collaboration with cross-functional teams.
- Wrote clean, scalable, and testable C# code following modern .NET practices.

Freelance .NET Developer (Backend / API) Apr 2023 – Nov 2023

Self-Employed | Remote

- Designed and delivered RESTful Web APIs with ASP.NET Core for multiple independent clients.
- Modeled relational databases and implemented data access with Entity Framework Core and SQL Server.
- Secured client-facing endpoints with JWT authentication/authorization and input validation.
- Owned the full delivery cycle: requirements, development, testing, deployment, and client communication.

PROJECTS

.NET Microservices on Kubernetes Personal Project

.NET 10, ASP.NET Core, EF Core, SQL Server, Redis, RabbitMQ, Docker, Kubernetes, Minikube

- Built and containerized microservices with ASP.NET Core Web API, EF Core, and SQL Server using Docker multi-stage builds and Docker Compose.
- Added Redis caching and asynchronous service-to-service communication through RabbitMQ producers and consumers.
- Deployed to Kubernetes (Minikube) using Deployments, Services, Namespaces, Secrets, and Persistent Volume Claims.

Private Lessons Platform ITI Graduation Project | Mar – Apr 2023

ASP.NET Web API, Entity Framework, LINQ, SignalR, JavaScript, Bootstrap

- Online platform connecting students with private tutors, featuring booking and real-time notifications via SignalR.

Clinic Management System Desktop Application | Feb – Mar 2023

Windows Forms, Entity Framework, LINQ

- Desktop application for managing clinic patients, appointments, and medical records.

EDUCATION

Intensive Code Camp – .NET Full-Stack Development Dec 2022 – Apr 2023

Information Technology Institute (ITI), Ministry of Communications and Information Technology

Bachelor of Commerce Sep 2016 – Aug 2020

Beni Suef University

LANGUAGES

Arabic (Native) · **English** (Professional)
