PROFESSIONAL SUMMARY

Full Stack .NET Developer with 3+ years of experience developing and maintaining production enterprise web applications using C#, ASP.NET Core, Angular, and SQL Server. Experienced in RESTful API development, Entity Framework Core, Clean Architecture, CQRS, and advanced SQL query optimization. Hands-on project experience building containerized .NET microservices using Docker and Kubernetes, with practical experience in Redis, RabbitMQ. Proven track record of troubleshooting complex monolithic systems, integrating third-party services, and delivering end-to-end features. Seeking a Mid-Level/Senior Full Stack .NET Developer role focused on building scalable, maintainable, and high-performance applications.

TECHNICAL SKILLS

- **Languages:** C#, TypeScript, JavaScript, SQL
- **Backend:** ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, LINQ, SignalR, Hangfire, FluentValidation, AutoMapper, MediatR, JWT, Unit Testing, Multi-tenant
- **Frontend:** Angular, HTML5, CSS, Bootstrap, jQuery, AJAX
- **Database:** SQL Server (stored procedures, indexing, execution plans, query optimization), Oracle, Redis
- **Architecture:** Clean Architecture, CQRS, SOLID, OOP, REST APIs, Microservices, Monolithic Systems, Message-driven design
- **DevOps & Tools:** Azure DevOps, Docker, Docker Compose, Kubernetes, Minikube, RabbitMQ, Git/GitHub, Firebase, Agile, Power BI

PROFESSIONAL EXPERIENCE

Full-Stack .NET Developer | Health Insights Group | Cairo, Egypt | Jan 2025–Present

- Engineered and scaled full-stack enterprise healthcare web applications across API and UI layers using C#, ASP.NET Core, Angular, JavaScript, jQuery and SQL Server.
- Optimized complex SQL queries on high-volume database tables by analyzing execution plans and refining query logic using CROSS APPLY, reducing execution time from 60 seconds to 10 seconds (83% improvement).
- Integrated Webex guest-to-guest meeting functionality directly into the enterprise system, engineering a seamless flow that enables meetings to launch without requiring a host.
- Integrated Power BI reports into the healthcare system, enabling users to access interactive dashboards and data insights directly within the application.
- Redesigned and enhanced the existing queuing system to support multi-tenancy at both application and database levels, enabling multiple hospitals to operate independently with tenant-specific data and configurations.
- Designed and delivered robust RESTful APIs and integrated them with Angular frontends to power core product features.

.NET Developer | Quad insight | Remote | Nov 2023–Dec 2024

- Engineered and scaled .NET Core web applications to streamline daily veterinary clinic operations, ensuring system reliability and high availability.

- Collaborated with cross-functional teams to architect system improvements and guide technical design decisions within a monolithic architecture environment.
- Built and optimized high-performance data access layers leveraging Entity Framework and SQL Server.
- Wrote clean, scalable, and testable C# code strictly adhering to modern .NET practices and design patterns.

Freelance .NET Developer (Backend / API) | Self-Employed | Remote | Apr 2023–Nov 2023

- Designed and delivered RESTful Web APIs with ASP.NET Core for multiple independent clients.
- Modeled complex relational databases and implemented secure data access utilizing Entity Framework Core and Oracle database.
- Secured client-facing endpoints with robust JWT authentication/authorization and strict input validation protocols.
- Owned the full end-to-end delivery cycle: requirements gathering, backend development, testing, deployment pipelines, and client communication.

PROJECTS

.NET Microservices on Kubernetes | Personal Project
Technologies: .NET 10, ASP.NET Core, EF Core, SQL Server, Redis, RabbitMQ, Docker, Kubernetes, Minikube

- Architected and containerized microservices with ASP.NET Core Web API, EF Core, and SQL Server using Docker multi-stage builds and Docker Compose.
- Implemented Redis caching and asynchronous service-to-service communication through RabbitMQ producers and consumers.
- Deployed the distributed system to Kubernetes (Minikube) utilizing Deployments, Services, Namespaces, Secrets, and Persistent Volume Claims.

Private Lessons Platform | ITI Graduation Project | Mar 2023–Apr 2023
Technologies: ASP.NET Web API, Entity Framework, LINQ, SignalR, JavaScript, Bootstrap

- Developed an online platform connecting students with private tutors, featuring scheduling tools, booking management, and real-time notifications via SignalR.

Clinic Management System | Desktop Application | Feb 2023–Mar 2023
Technologies: Windows Forms, Entity Framework, LINQ

- Engineered a comprehensive desktop application for managing clinic patients, tracking appointments, and securely handling medical records.

EDUCATION

Intensive Code Camp - .NET Full-Stack Development | Dec 2022–Apr 2023
Information Technology Institute (ITI), Ministry of Communications and Information Technology

Bachelor of Commerce | Sep 2016–Aug 2020
Beni Suef University

LANGUAGES

Arabic (Native) | English (Professional)
